2008 Arkansas School Performance Report

THE ARKANSAS DEPARTMENT OF EDUCATION
OFFICE OF ACADEMIC ACCOUNTABILITY
ARCH FORD BUILDING, 4 CAPITOL MALL
LITTLE ROCK, AR 72201-1070

UNDERSTANDING the 2008 Arkansas School Performance Report

abcdefghijklmnopqrstuvwxy^z123456789

**ARKANSAS
DEPARTMENT
OF EDUCATION**

Office of Public School Academic Accountability
2008 Performance Report

TABLE OF CONTENTS:

Indicator 1: Achievement 2-19
 Indicator 2: Access 20
 Indicator 3: Retention 20
 Indicator 4: Discipline 20
 Indicator 5: Demographics 21
 Indicator 6: Choice 21
 Indicator 7: Economic 21

The Office of Public School Academic Accountability gathers and publishes information based on legislative mandates. The core of the Arkansas Performance Report consists of specific statistical performance information. This information is organized into seven essential accountability indicators that all parents need to know about their child's school. For more information, contact Dr. Charity Smith, Assistant Commissioner, Division of Public School Academic Accountability at (501) 682-1298.

Accountability Indicator 1: ACHIEVEMENT

Achievement is measured by state and national assessments. State assessments include the Benchmarks and End-of-Course Criterion-Referenced Exams. National assessments include the SAT-10 Norm-Referenced Exam, the National Assessment of Educational Progress (NAEP) and the American College Test (ACT). The Achievement Section includes participation in Advanced Placement classes, the school gain rating and the No Child Left Behind Adequate Yearly Progress.

Accountability Indicator 2: ACCESS

Access is measured by state enrollment by grade, annual accreditation status, attendance rate, dropout rate, graduation rate, grade inflation rate, college remediation rate, October 1 enrollment, and district compliance with the requirement to provide textbooks for all pupils.

Accountability Indicator 3: RETENTION

Retention is the number and percentage of students retained for each grade.

Accountability Indicator 4: DISCIPLINE

Discipline is an indicator of school climate and includes discipline policies distributed to parents, disciplinary training for staff, parental involvement plans, the number of serious incidents, and district alternative learning environment compliance.

Accountability Indicator 5: DEMOGRAPHICS

Demographic data about schools includes contextual information about teaching quality, teacher licensure and school board member training.

Accountability Indicator 6: CHOICE

Choice data describes the percentage of students choosing to go to another district.

Accountability Indicator 7: ECONOMIC

Economic includes mills voted, expenditure per student, teacher salaries, school expenditures, and free and reduced lunch rates.

Arkansas Benchmark Scores Continue Steady Climb

Arkansas students continued to show improvement in the latest round of state Benchmark scores, with increases being made at every grade level which also resulted in a closing of the achievement gap for the second consecutive year. For the first time ever, in 2008 more than 50 percent of students scored proficient or advanced on the Arkansas Benchmark exams. Other Arkansas Benchmark "firsts" include:

- First time more than 60% proficient and above in Grade 3 Literacy
- First time more than 70% proficient and above in Grade 4 Math
- First time more than 60% proficient and above in Grade 4 Literacy
- First time more than 60% proficient and above in Grade 5 Literacy
- First time more than 70% proficient and above in Grade 6 Math
- First time more than 60% proficient and above in Grade 7 Math
- First time more than 50% proficient and above in Grade 8 Math

Arkansas students improved performance in geometry and algebra in 2008 from the previous year:

- Of the 35,602 students taking the algebra I end-of-course exam in April, 66 percent scored proficient and above. That compares to 61 percent in 2007.
- Of the 986 students taking the geometry end-of-course exam in January, 68 percent scored proficient and above. That compares to 61 percent in 2007.

The number of Arkansas students taking the ACT test has increased from 21,005 in 2006 to 21,403 in 2007 and 22,545 in 2008. Arkansas students improved performance on ACT tests in 2008 from the previous year:

- The Arkansas English ACT score was 20.7 compared to 20.5 in 2007.
- The Arkansas Reading ACT score was 21.0 compared to 20.9 in 2007.
- The Arkansas Math ACT score was 20.1 compared to 19.9 in 2007.
- The Arkansas Science ACT score was 20.3 compared to 20.2 in 2007.

Performance Report

abcdefghijklmnopqrstuvwxy123456789

Questions to consider

about your child's school:

1. Is the percentage of students scoring at grade level higher or lower than overall district and state averages?
2. How does the attendance rate compare with that of the district?
3. How does the percentage of certified teachers at the school compare with the overall statewide percentage?
4. Are policies used to ensure a safe learning environment?
5. Are there specific areas in which the school performed better than the overall district and state averages?

Questions to discuss

in your community:

1. What is being done to increase school performance?
2. What can I do to help the school improve?
3. What can I do to help my child increase his/her academic achievement?
4. What kind of parental activities are offered at the school, and how do I get involved?
5. Has the performance of the school improved or declined?
6. How can the local community support school improvement and student achievement in my district?

Dear Parents:

The Arkansas Department of Education is pleased to provide the 2008 Arkansas School Performance Report. The statistical information in this report will enable you to determine the performance of your child's school on various measures, as well as other schools in your school district, the state and the nation. I encourage you to carefully review the information and contact your school with specific questions or concerns.

It is the intent of the Governor, the Arkansas General Assembly and the Arkansas State Board of Education to showcase performance and accountability in our schools. We hope that this report will empower you, as parents or guardians, to become more engaged in the process.

The majority of the data presented in the report is a result of requirements contained in the Arkansas Comprehensive Testing, Assessment and Accountability Program (ACTAAP). ACTAAP has been the most important blueprint for educational reform in our state and is anchored by our Smart Arkansas Initiative, which encompasses Smart Start (Grades K-4), Smart Step (Grades 5-8) and Smart Arkansas (Grades 9-12). Smart Arkansas represents the state's effort to provide the support, resources and necessary interventions to produce an education system that will prepare all Arkansas public school students to succeed in the 21st-century economy.

If you need additional information about the Arkansas School Performance Report, please contact your local school administrator.

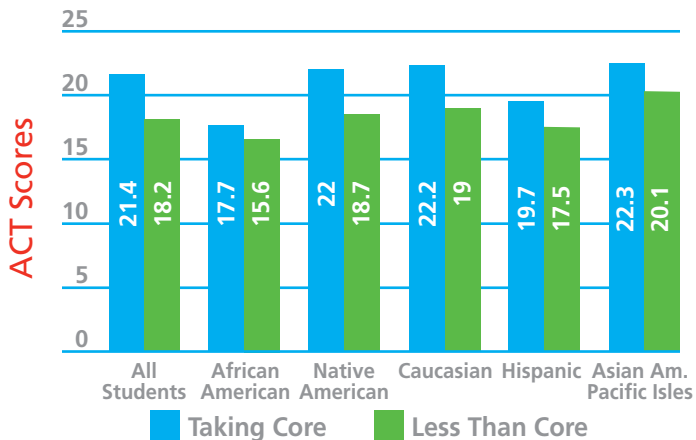

T. Kenneth James, Ed.D.
Commissioner, Arkansas Department of Education

Core Curriculum

Improves Student Performance on the ACT:

Arkansas students who take the recommended core courses or more continue to perform better on ACT compared with students who take less than the recommended core. The recommended core courses, according to ACT, include four years or more of English, three years or more of math, three years or more of social studies, and three years or more of natural sciences.

2008 Arkansas ACT Scores Taking Core Compared With Taking Less Than Core

2008 Arkansas ACT Math Scores Increased by Taking Advanced Courses

Definitions

President George Bush signed the No Child Left Behind (NCLB) Act in January 2002. The legislation mandates increased accountability for states, school districts and schools; greater choice for parents and students, particularly those attending low-performing schools; more flexibility for school districts and schools in the use of federal education dollars; and a stronger emphasis on reading. The NCLB Act requires that student performance be reported for all students, which is referred to in this document as the Combined Population, as well as for students in several other categories or subgroups. The subgroups include African-American students, Hispanic students and Caucasian students, as well as economically disadvantaged students, students with disabilities, and students who are limited English proficient. Results are also reported for migrant students, who are students who change schools throughout the year, often crossing school districts and state lines, to follow their families who seek work in agriculture, fishing, dairies, logging or the food processing industry. Performance results are also reported for male and female students.

NCLB also requires that at least 95 percent of a school's students be tested using the state's exams. This figure is one of the factors used in determining a school's performance.

INDICATOR 1: ACHIEVEMENT

ACADEMIC PERFORMANCE LEVELS FOR AUGMENTED CRITERION-REFERENCED TEST

Student performance on the Benchmark, End-of-Course and the Grade 11 Literacy Exams is reported by performance levels. Listed below are the four performance levels and a brief definition for each one.

Advanced: Advanced students demonstrate superior performance well beyond proficient grade-level performance. They can apply Arkansas' established reading, writing and mathematics skills to solve complex problems and complete demanding tasks on their own. They can make insightful connections between abstract and concrete ideas and provide well-supported explanations and arguments.

Proficient: Proficient students demonstrate solid academic performance for the grade tested and are well prepared for the next level of schooling. They can use Arkansas' established reading, writing and mathematics skills and knowledge to solve problems and complete tasks on their own. Students can tie ideas together and explain the ways their ideas are connected.

Basic: Basic students show substantial skills in reading, writing and mathematics; however, they only partially demonstrate the abilities to apply these skills. They demonstrate a need for some additional assistance, commitment or study to reach the proficient level.

Below Basic: Below Basic students fail to show sufficient mastery of skills in reading, writing and mathematics to attain the basic level.

Note: The numbers posted for the Benchmark, End-of-Course and Grade 11 Literacy Exams indicate the percent of students scoring at each of the four performance levels, as well as those students scoring at proficient and advanced. In the Benchmark graphs, in some instances because of rounding, "Below Proficiency" added to "At or Above Proficiency" may not equal 100 percent. Blanks in this report indicate that this information was not available at the time of printing; does not apply to a specific school's grade levels; or the number of students tested was less than 40. Corrections were made to data in this report after entry errors by a small percentage of schools were discovered. However, some discrepancies may not have been fully resolved. As additional information becomes available, it will be published on http://www.arkansased.org/performance_report/index.html.

ARKANSAS BENCHMARK EXAMS

This number shows the percent of students performing at each of the four performance levels, as well as those students scoring at or above proficient, on the Arkansas Benchmark Exams. The exams are written and designed by the testing contractor in partnership with teachers and the Arkansas Department of Education for Arkansas schools. The exams are administered to students in Grades 3-8 in the areas of reading/literacy and mathematics. Additionally, Grades 5 and 7 include science.

END-OF-COURSE EXAMS

The End-of-Course Exams are administered to students at the end of a course to determine whether the student demonstrates attainment of knowledge and skills necessary for mastery of that subject. End-of-Course Exams are given in algebra I, geometry and biology.

GRADE 11 LITERACY EXAM

This exam is administered to students completing Grade 11. The exam is given in March of each year.

NORM-REFERENCED TEST (SAT-10)

The SAT-10 Norm Referenced Test was combined with state-mandated criterion-referenced testing to form the Augmented Benchmark Examinations. The SAT-10 compares Arkansas' student performance with the performance of a sample of students from across the country. The results are reported by percentile ranging from a low of 1 to a high of 99. The 50th percentile represents the national average, or the point above which half of the national sample scored. This figure indicates the average performance. Students in Grades 3-8 took norm referenced items in the areas of reading comprehension, mathematics problem solving and language. Additionally, Grades 5 and 7 include science. In Grades K-2 and 9, students were tested on reading comprehension and mathematics problem solving.

AMERICAN COLLEGE TEST (ACT)

This number shows the average scores of high school seniors taking the American College Test (ACT). The ACT score ranges from 1 to 36. Most public colleges and universities in Arkansas require the ACT as part of their admissions process. The average scores are for mathematics and English, as well as an overall composite score. Students have more than one opportunity to take the exam. The data reported here are for the best test scores for the students in the graduating class.

ADVANCED PLACEMENT CLASSES

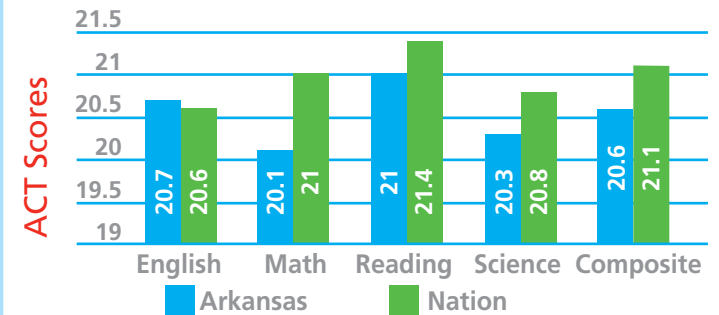

These figures indicate the number of students who are enrolled in Advanced Placement (AP) classes, and the number of AP exams taken. AP exams are given at the completion of an AP class. Also reported is the number of AP exams with scores of 3 or above. Students must score a 3 or better in order to be eligible to receive college credit for the course.

ADEQUATE YEARLY PROGRESS (AYP)

NCLB requires each state to define Adequate Yearly Progress (AYP) for school districts and schools using student performance data and a non-academic indicator. The state's goals must be set based on student performance on the assessment system. AYP is defined as the increase in the percentage of students becoming proficient who will move the school toward the goal of 100 percent proficient by the year 2014.

Aside from the academic performance of a school's students, a school can be placed in "School Improvement" if less than 95 percent of eligible students were tested or the school did not meet the secondary indicator. For elementary and middle schools, the secondary indicator was student attendance. At the high school level, the secondary indicator was the graduation rate.

2008 National ACT Score Comparisons

Arkansas ACT Scores Five Year Trend

Act 35 Annual School Ratings System

The Act 35 of 2003 Annual School Rating System was designed for the purpose of improving student achievement through school accountability and recognition. As required, the rating system will be based on the tests included in the Arkansas Comprehension Testing, Assessment and Accountability Program (ACTAAP).

Act 35 of 2003, §6-15-2101 (c), requires that each school be classified into "two (2) category levels" as follows:

- "Category One" for the "school's improvement gains" tracked longitudinally using value-added calculation known as the annual improvement category level and,
- "Category Two" based on "performance from the prior year" referred to as the annual performance category (or "status").

The Standards Setting for Category One Grades 3-8 was completed in the Spring of 2008. The Annual School Rating System will be finalized for both categories in 2009-10.

How To Calculate Category One (Gains)

1. Student growth is based upon changes in student performance levels across two adjacent years.
2. To assess annual changes more precisely, each student performance level (Below Basic, Basic, Proficient, and Advanced) is split into two sub-categories (Below Basic 1, Below Basic 2, Basic 1, Basic 2, Proficient 1, Proficient 2, Advanced 1 and Advanced 2).
3. If student achievement improves, value is added. For each scale score performance sub-category position that a student moves to the right, (a higher performance sub-category) .5 is added. For each position that a student moves to the left, (lower performance), .5 is subtracted.

Schools will be classified in one of the following categories for Gains.

Cut Score	Performance Category	Rating
0.25 and above	Schools of excellence for improvement	5
0.13 - 0.24	Schools exceeding improvement standards	4
0.01 - 0.12	Schools meeting improvement standards	3
-0.12 - 0.0	Schools approaching standards (alert)	2
-0.13 and below	Schools in need of immediate improvement	1

Use the scale score for a student from 2007 and the table below to find the sub-category for 2007. If the student scored 360 in Grade 4 Literacy in 2007, he would be in the Basic 1 sub-category (Bas 1). The same student scored 495 in Grade 5 Literacy in 2008 to be in the Basic 2 sub-category (Bas 2). Since the student moved from sub-category Bas 1 in 2007 to Bas 2 in 2008, a .5 gain point is added.

Scale Score Performance Sub-Categories									
Grade	Subject	BB1	BB2	Bas 1	Bas 2	Prof 1	Prof 2	Adv 1	Adv 2
3	Lit	1-262	263	330	415	500	577	654	745
	Math	1-369	370	409	454	500	543	586	637
4	Lit	1-292	293	354	456	559	653	748	842
	Math	1-451	452	495	527	559	599	640	691
5	Lit	1-334	335	382	493	604	701	799	888
	Math	1-500	501	544	574	604	650	697	742
6	Lit	1-361	362	417	529	641	732	823	929
	Math	1-533	534	569	605	641	681	722	774
7	Lit	1-371	372	426	549	673	770	867	950
	Math	1-585	586	622	647	673	718	764	811
8	Lit	1-453	454	507	603	700	807	914	958
	Math	1-611	612	655	677	700	751	802	840

If a student scored 655 in Grade 3 Literacy in 2007 and 355 in Grade 4 Literacy in 2008, the student would produce negative two gain points by declining from Adv 1 to Bas 1.

To illustrate the school calculation, the table below shows the computation of the index for a school with only Grade 4 students, 21 of whom took the Literacy test and 19 the Mathematics test. The school index is -0.025, which reflects a very slight decline in achievement. The school rating would be Level 2 – Schools approaching standards (alert).

Gain Points	Literacy Grade 4		Mathematics Grade 4	
	Count	Total Gains	Count	Total Gains
-2.5				
-2.0	1	-2.0 x 1 = -2.0		
-1.5	2	-1.5 x 2 = -3.0		
-1.0	3	-1.0 x 3 = -3.0	2	-1.0 x 2 = -2.0
-0.5	4	-0.5 x 4 = -2.0	3	-0.5 x 3 = -1.5
0.0	5	0.0 x 5 = 0.0	5	0.0 x 5 = 0.0
0.5	3	0.5 x 3 = 1.5	4	0.5 x 4 = 2.0
1.0	3	1.0 x 3 = 3.0	3	1.0 x 3 = 3.0
1.5			2	1.5 x 2 = 3.0
2.0				
Sum	21	-5.5	19	4.5

Sum of all total gains = -5.5 + 4.5 = -1.0. Sum of counts = 21 + 19 = 40. School Improvement Gain Index = Sum of Total Points / Sum of Counts = -1.0/40 = -0.025.

A school designated as Year One of School Improvement did not make AYP for two consecutive years. Corrective Action is shown for a school that did not make AYP for four consecutive years. Restructuring is shown for a school that did not make AYP for five or more consecutive years.

INDICATOR 2: ACCESS

DISTRICT PROVIDES TEXTBOOKS FOR ALL PUPILS

This indicates compliance with the requirement for the district to provide textbooks and other instructional materials for all pupils without cost to the pupils.

ANNUAL ACCREDITATION STATUS

Accredited means that a school complies with the standards set by the State Board of Education. Accredited-Cited status is assigned for teacher licensure deficiencies, improper class sizes caused by population shifts and failure to provide required reports. Probationary status can be assigned for failure to correct a cited violation by the given deadline, improper class sizes not caused by population shifts, failure to teach required courses or align courses with content standards, teacher licensure deficiencies, failure to employ the required staff, lack of required written policies, failure to file an Equity Compliance Report and failure to provide the required guidance, health, media, special education or gifted and talented programs.

ATTENDANCE RATE

This number indicates the average percentage of students actually attending school on any given day during the school year.

DROPOUT RATE

This figure is the percentage of students dropping out of school in Grades 7-12 from October of one school year to October of the next. Beginning with the 2003-04 school year, students who enter a GED program are considered as dropout students. The change is part of the mandates of NCLB.

GRADUATION RATE

This number indicates the percentage of students enrolled during Grades 9-12 and completing Grade 12. The standard four-year adjusted cohort high school graduation rate for Arkansas, recommended by the National Governor's Association, was used to calculate the state graduation rate. The method of calculating individual school and district graduation rates in this Arkansas School Performance Report uses a different formula. The graduation rate reflects the NCLB requirement to count GED students as dropouts.

GRADE INFLATION RATE

This figure reports the statistical gap between actual grades assigned for core classes at the high school level and student performance on End-of-Course exam grades.

COLLEGE REMEDIATION RATE

This number indicates the percentage of incoming college freshmen who would have to take a remedial course or courses at an Arkansas college or university based on their performance on the mathematics and English sections of the ACT.

OCTOBER 1 ENROLLMENT

This number indicates the number of students enrolled on October 1.

INDICATOR 3: RETENTION

STUDENT RETENTION

These figures indicate the number and the percentage of students retained in Grades 1-8.

INDICATOR 4: DISCIPLINE

SCHOOL DISCIPLINE

This information indicates whether the school's discipline policy has been distributed to parents and whether the school's staff has received discipline policy training. Another notation in this section indicates whether a school has adopted a parental involvement plan. The number shown for expulsions indicates the percentage of students who have been expelled from school during the school year. The next numbers indicate the percentage of school-related weapon or assault incidents involving students that occurred at the school. The district's Alternative Learning Environment (ALE) compliance status indicates if the ALE is conducive to learning, and provides intervention services designed to address individual needs of students.

INDICATOR 5: DEMOGRAPHICS

TEACHING STAFF

The first number indicates the percentage of teachers at the school who have a valid Arkansas teaching license and teach in the area(s) for which they hold the license. When schools employ teachers for more than 30 days who are not fully qualified (licensed), the schools are required to request a waiver from the State Board of Education to continue to employ those teachers. The percent of teachers teaching out of area represents the number of waivers divided by the number of certified (licensed) staff. This category also shows the percentage of teachers who have a bachelor's degree, a master's degree, or an advanced degree. The percent of (Core Academic) Classes Not Taught by Highly Qualified Teachers is divided into three sections. The first section has information for high poverty schools – the top quartile of schools with students receiving free and reduced-price lunches. The second section is for low poverty schools – the lowest quartile of schools with students receiving free and reduced-price lunches. The third section is an aggregate of all economic levels. Highly Qualified Teachers have at least a bachelor's degree, are licensed and demonstrate content knowledge in their subject area(s).

SCHOOL BOARD MEMBER TRAINING

This section lists the School District Board of Directors and the hours of training and instruction they have received in school-related topics.

INDICATOR 6: CHOICE

PERCENT OF STUDENTS OBTAINED THROUGH SCHOOL CHOICE

This number indicates the percentage of students who reside in another district, but are attending this school as part of the Arkansas Public School Choice Act.

INDICATOR 7: ECONOMIC

TAXPAYER INVESTMENT

The district's millage rate is the tax rate approved for the district by the voters in the last annual school election.

How Category Two (Status) Will Be Calculated

Multiply the number of students (20) by the points assigned to the category (4) to get the points produced by the students in the Advanced category. Add up the points for each category. Divide the total points for the school (260) by the number of students (100) to get a rating score (2.6), meeting standards.

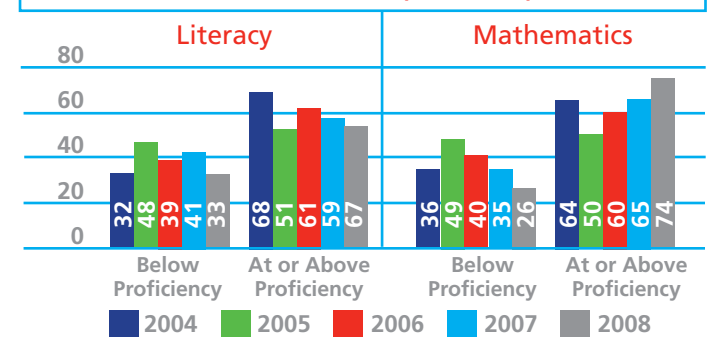

Number of Students	Categories	Points Assigned to Categories	Total
20	Advanced	4	80
30	Proficient	3	90
40	Basic	2	80
10	Below Basic	1	10
Total Points for the school for all categories			260
Cut Score	Performance Category	Rating	
3.23 - 4.0	Schools of excellence	5	
2.79 - 3.22	Schools exceeding the standards	4	
2.21 - 2.78	Schools meeting standards	3	
1.719 - 2.20	Schools approaching the standards (alert)	2	
1.0 - 1.718	Schools in need of immediate improvement	1	

Arkansas Benchmark (Grade 3)

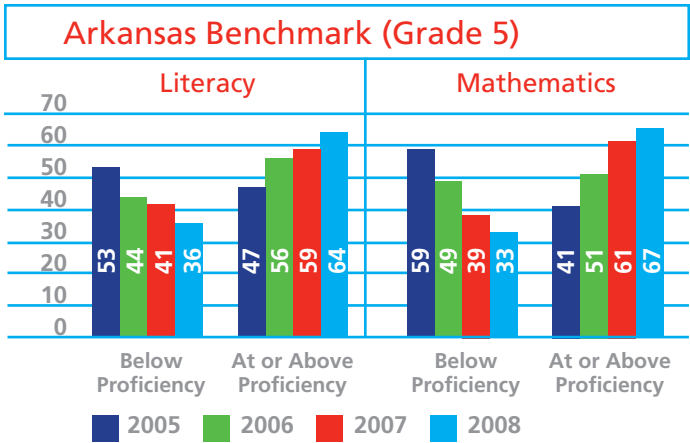

Combined Population. This is the fourth year for Benchmark Grade 3.

Arkansas Benchmark (Grade 4)

Cut scores were reset in 2005 reflecting higher student performance expectations.

Combined Population. This is the fourth year for Benchmark Grade 5.

Combined Population.

Combined Population. This is the fourth year for Benchmark Grade 7.

SCHOOL EXPENDITURES

The expenditure per student shows how much money the school spends for each student. The average teacher salary shows the average annual salary of staff members who have an Arkansas teaching license. The next number indicates the total expenditures for the school and district. Extracurricular expenses pay for activities that are not part of the required curriculum. Capital expenditures are for land, buildings, vehicles and equipment that should last more than a year. Debt service expenditures are for payment of principal and interest on long-term debt.

PERCENT OF STUDENTS ELIGIBLE FOR FREE AND REDUCED-PRICE MEALS

This number indicates the percentage of students at the school eligible to receive free and reduced-price meals.

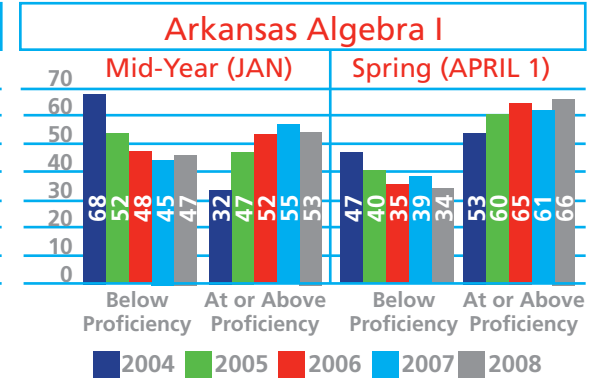

REPORT GIVES ARKANSAS TOP GRADES IN EDUCATION CATEGORIES

While Arkansas did not receive As in all categories, the state did receive As in the following: A in Education Standards, A- in Accountability, A in Early Childhood Education, A in Economy and Workforce, A- in the Teaching Profession Incentives and Allocation, A- in the Teaching Profession Building and Supporting Capacity and A- in School Finance Equity. The grades were reported in the 2009 edition of "Quality Counts." "Quality Counts" is a nationally respected assessment of educational progress published annually by the Washington-based *Education Week*.

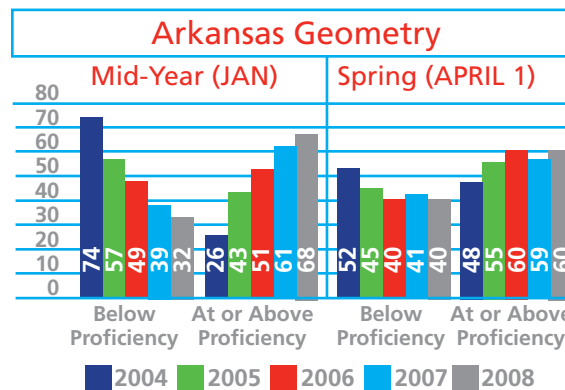

Note: Data on this report is correct as of 02/15/2009. For more information, contact Dr. Charity Smith, Assistant Commissioner, Division of Public School Academic Accountability at (501) 682-1298.
